AIS

As fresh -
the sky scraper
next door!

Standing on top of building, which is crowded
inside with people (tourists) there is a perception
of a large object falling (heading toward the
building). It is traveling at a great velocity
and is very dense. There is a high-pitched
whining sound from the object. The object
causes structural damage as there is a
crack of the large object crashing through the
building. Newspaper headlines tell of disaster,
many people hurt. ~~but so long the collapse is~~
~~sanctity construction.~~
